REF: Student Information System Proposal

Dear Sir/Madam,

CoreLink Consulting Ltd. is hereby providing you with a comprehensive proposal for our EduRole Information Management System. This document outlines the functionality of our EduRole information system as well as a financial proposal for the different levels of support.

Our platform has a strong track record, currently used by over 45 universities and colleges across Zambia, Zimbabwe and Botswana and offers a comprehensive solution to manage student information.

We would be happy to come through for a comprehensive demonstration of the capabilities of our platform.

We look forward to your response to this proposal.

With kind regards,

Rowan J. Vos
Managing Director
CoreLink Consulting Ltd.

APPENDIX 1 - COMPANY PROFILE WITH PACRA REGISTRATION CERTIFICATES, ZRA TAX CLEARANCE, ZPPA SUPPLIER REGISTRATION AND ICTAZ MEMBERSHIP

1. Executive Summary

CoreLink Consulting Ltd. proposes EduRole Campus, a proven Student Information System, for the Medpro College of Health Sciences. EduRole Campus manages the complete student lifecycle - from application and admission, through registration, fees and examinations, to transcripts, graduation and alumni relations - alongside HR and payroll, procurement, infrastructure, communication and document management. The platform is extendable with over 125 modules and is in production at more than 45 universities and colleges across Zambia, Zimbabwe and Botswana.

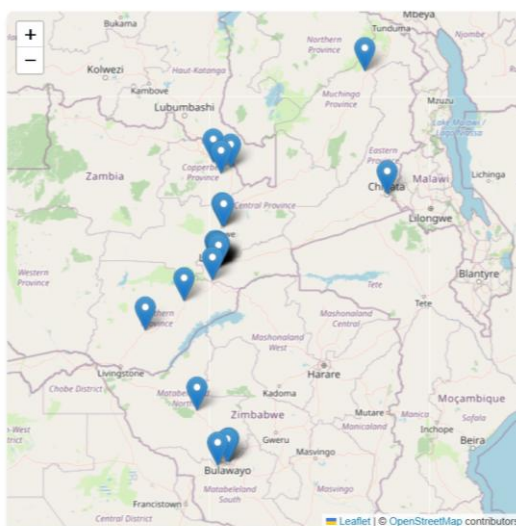

Implementation takes approximately 14 weeks from contract signing to go-live, following a proven five-phase approach that includes data migration, training and parallel running before cut-over. We would welcome the opportunity to demonstrate the platform to the University's management and ICT teams.

2. What is EduRole

EduRole is a full-service information management platform for higher education institution management, also called a Student Information System (SIS). CoreLink has developed 3 versions of EduRole:

1. **EduRole Campus** – A comprehensive platform for Universities and Colleges offering over 125 modules that can easily be customized.
2. **EduRole School** – Our platform for Primary and Secondary education.
3. **EduRole EMIS** – A comprehensive offering for government ministries or sector regulators.

The EduRole Campus platform is in use with many institutions in Zambia and is currently expanding its footprint across Africa fast. For example, in Zambia, EduRole is active at universities and colleges around the region.

Deployment & Reach

Originally designed for universities in Zambia, EduRole boasts a small footprint and requires minimal server resources. Its design prioritizes easy implementation, making it accessible regardless of an institution's existing ICT expertise.

Currently, EduRole is trusted by over **45 institutions** across Central and Southern Africa.

Notable institutions in the region utilizing EduRole include:

- | | |
|--|--------------------------------------|
| • ZCAS University | • NUST (Zimbabwe) |
| • Kwame Nkrumah University | • Chipata College of Nursing |
| • Mulungushi University | • Kafue Institute of Health Research |
| • Eden University | • WARMA |
| • Mukuba University | • LBTC Lusaka |
| • Kapasa Makasa University | • George Benson Christian University |
| • TVTC Luanshya | • Zambia Institute of Tourism |
| • NORTEC Ndola | • Evelyn Hone College |
| • Lusaka Apex Medical University | • Lupane State University (Zimbabwe) |
| • Rusangu University | • Zimbabwe School of Mines |
| • Solusi University (Zimbabwe) | • ZIHRM |
| • National Institute of Public Administration (NIPA) | • ZIPS |
| • Levy Mwanawasa Medical University | • University of Lusaka (UNILUS) |

Originally designed for universities in Zambia; EduRole is able to run on a wide array of systems and has a small footprint with high performance. EduRole is built to be implemented with the greatest ease, no matter the level of ICT expertise.

EduRole works together with other popular academic solutions to create a central platform that integrates all services with single-sign-on (SSO). EduRole even has the option to integrate email directly in the platform to create an all-in-one portal for students and staff.

EduRole supports integration with the following popular solutions:

1. Moodle - Open source eLearning system
2. Sage Evolution – Accounting system, automate invoicing/Payments
3. Microsoft Navision – Accounting system from Microsoft.
4. DSpace - Open source institutional repository
5. Koha – Open source Library Management System

Custom integrations are our specialty and we have successfully integrated with a number of other accounting systems like Sun Systems.

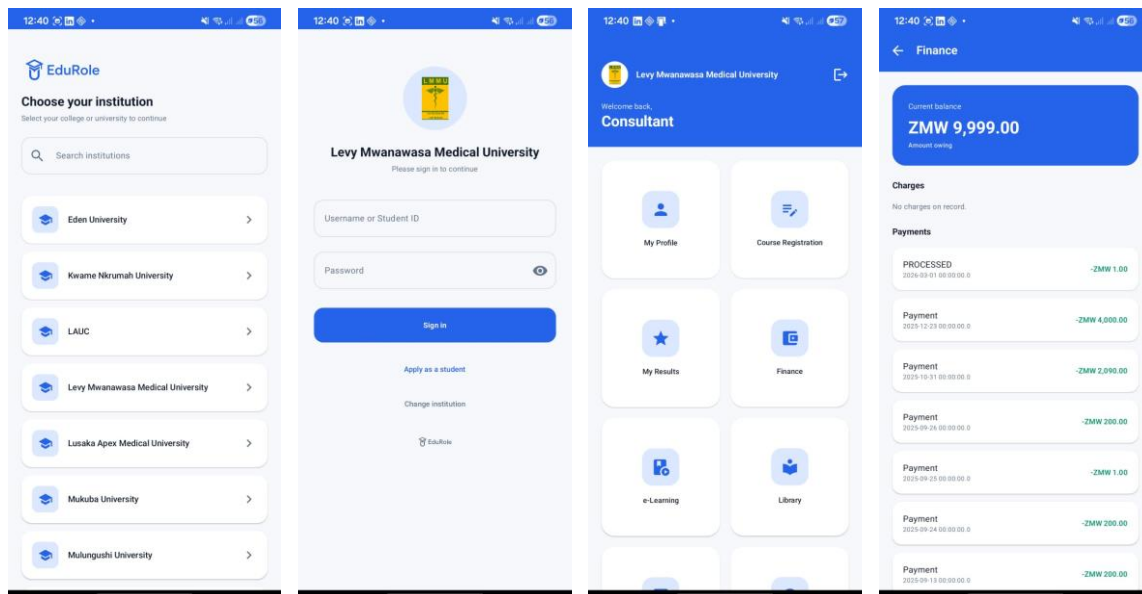

The EduRole Campus platform is especially suited for large universities with institutions like Mulungushi University, Kwame Nkrumah, Mukuba University, Eden University, University of Lusaka, Levy Mwanawasa Medical University and others already using it.

2.1. EduRole and the Medpro College of Health Sciences

As a fast growing college of health sciences, Medpro College of Health Sciences serves many students of full-time and distance students across its schools and directorates. This scale places heavy demands on admissions, registration, billing reconciliation, examinations and reporting. EduRole Campus was designed for exactly this environment: it is already in production at large Zambian public and private colleges and universities, supports full-time, part-time and distance study types out of the box, automates payment reconciliation with Zambian banks, and produces the statistical and regulatory reports expected by the Ministry of Education and the Higher Education Authority. A dedicated CoreLink team in Lusaka provides local, on-site support throughout implementation and operation.

2.2. The EduRole Mobile App

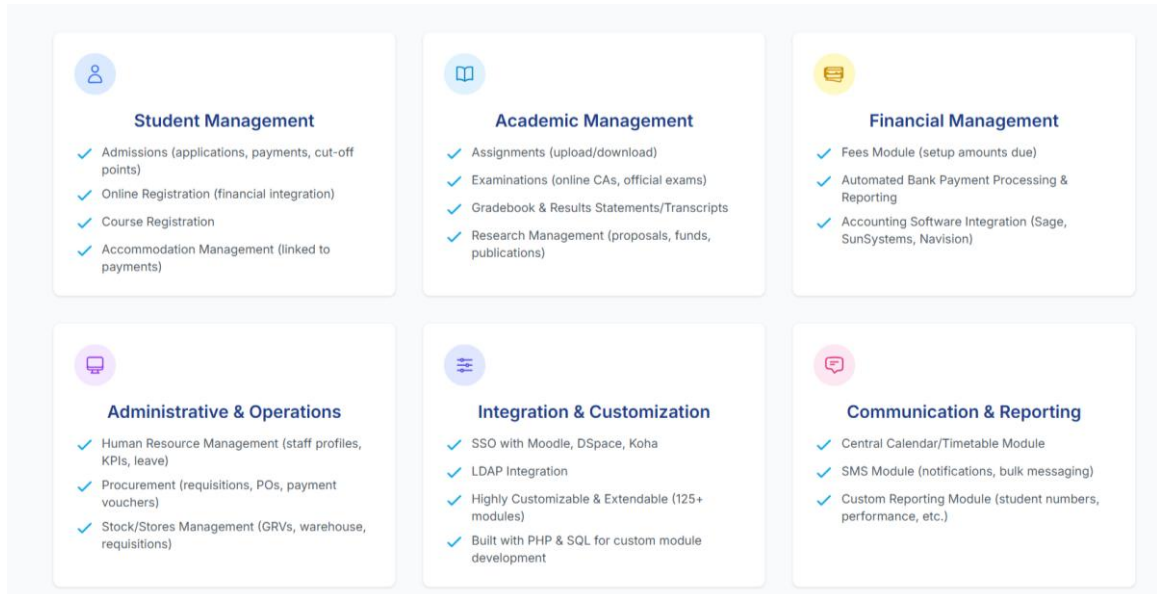

EduRole Campus is complemented by a mobile app that puts the college in every student's pocket. Students select their institution, sign in with their student number - or apply for admission directly from the phone - and get instant access to their profile, course registration, results, finances and payments, e-learning content and the library. The app carries the institution's own branding and gives distance and off-campus students the same services as students on campus.

THE EDUROLE MOBILE APP: INSTITUTION SELECTION, BRANDED SIGN-IN, STUDENT DASHBOARD AND FINANCE

3. Modules available in EduRole

The EduRole core platform can be customized for your organization by our experts. Over the years we have developed over 125 modules for EduRole. The EduRole core is secure by nature and has full role-based access control built in, supporting its own identity provider or working with existing IAM solutions. EduRole Campus is a multi-tenant solution meaning it can be setup to run multiple campus locations centrally.

The EduRole system is built upon a robust and extendable core architecture, designed to adapt to the diverse needs of educational institutions. This flexibility is achieved through a suite of specialized modules, developed by various experts, which can be seamlessly integrated to enhance and customize the core system's capabilities. Below are some of the key modules available to empower your institution:

1. Admission Management Module

Streamlined Student Onboarding: The Admission Module comprehensively manages the entire student application and admission lifecycle. From initial online application submissions to final enrollment, it provides a clear, step-by-step and fully auditable, process. Through our integrated workflow manager management can easily customize approval workflows, setting responsible offices for each approval task in the system.

Applicant Tracking & Workflow Management: Gain a centralized overview of all applicants, track their progress through customizable admission workflows, and manage communications effectively.

Automated Eligibility Assessment: Enhance efficiency and fairness with automated cut-off point calculations based on Grade 12 or A-Level results. This feature significantly speeds up the selection process.

Financial Integration: Seamlessly links with the Finance module to manage application fees, track payments, and ensure financial records are synchronized from the day of application.

2. Audit Module

Comprehensive Transaction Logging: EduRole offers a meticulous and comprehensive audit trail, capturing all financial and academic transactions that occur within the system. This ensures complete traceability and accountability. Through our SecureLock technology any tampering of data from the database is flagged. Each transaction has a security token that cannot be reproduced outside runtime, ensuring that only actions through the front-end of EduRole are recorded as true. Combined with required two-factor authentication for roles with rights pertaining to results management, user management and editing of core identity details this ensures that information can only be added or changed by an authorized user in the system.

Enhanced Security & Compliance: Track changes, access attempts, and critical operations, providing an invaluable tool for internal reviews and external compliance requirements.

Customizable Auditing: Easily tailor audit parameters and reporting to meet your institution's specific needs, ensuring you can monitor what matters most for your governance and operational integrity.

3. Accommodation Management Module

Efficient Housing Management: Effectively manage all aspects of student accommodation, from defining different campus locations, hostel buildings, and room types to assigning students individual bedspaces and tracking occupancy.

Resource Optimization: Maintain a clear inventory of available rooms and facilities, facilitating better resource allocation and planning.

Integrated Billing: Directly links with the Finance module to automate the billing and payment processes for accommodation fees, deposits, and other related charges, providing convenience for both students and staff.

4. Assignments Module

Centralized Assignment Hub: Provides a dedicated platform for instructors to upload assignment briefs, supporting materials, and deadlines. Students can easily access and download these materials anytime, anywhere.

Streamlined Submission & Feedback: Students can submit their completed assignments directly through the module. Staff can then access these submissions for marking, provide feedback, and record grades efficiently.

Improved Accessibility & Organization: Reduces reliance on paper and email, keeping all assignment-related activities organized and easily accessible for both students and faculty.

5. Research Management Module

End-to-End Research Lifecycle Support: Manage the entire research process, from initial proposal submission and ethical approvals to fund allocation and project tracking.

Compliance & Reporting: Ensure research projects align with Higher Education Authority (HEA) requirements and other regulatory standards. Generate comprehensive reports on research activities and outcomes.

Faculty Publication Tracking: Allows staff to maintain a record of their publications directly on their profiles, facilitating easy generation of institutional research output reports and showcasing academic achievements.

6. Timetabling Module

Institution-Wide Scheduling: Provides a central calendar and timetabling system for the entire institution, viewable by all relevant stakeholders.

Program-Specific Timetables: Create and manage unique timetables for individual programs, courses, or student groups, minimizing clashes and improving organization.

Event Management: Can be used to schedule academic events, meetings, and other important institutional activities, ensuring everyone stays informed.

7. Card Printing Module (ID Cards)

Professional ID Card Production: Design and print professional student and staff identification cards directly from the system.

RFID Technology Support: Offers support for RFID-enabled cards, opening possibilities for integration with access control systems, library checkouts, and cashless payment solutions.

Enhanced Security & Utility: Improve campus security and streamline various on-campus services by utilizing versatile ID cards (e.g., for printing services, meal plans).

8. Course Module

Foundation for Academic Structure: This essential module allows for the creation, definition, and management of all courses offered by the institution, including course codes, descriptions, credit values, and prerequisites.

Seamless Course Registration: Facilitates student course registration, ensuring students can select and enroll in their required and elective courses.

Prerequisite for Gradebook: Serves as a foundational element for the Grades module, as student grades are tied to their registered courses.

9. Examination Module

Flexible Online & Offline Assessment: Design, administer, and manage various types of examinations. Supports online exams for continuous professional assessment or formative quizzes, as well as facilitating the management of traditional, in-person summative exams.

Secure Assessment Environment: Implement secure online examination protocols to ensure academic integrity.

Automated & Manual Grading Options: Depending on the exam format, benefit from automated grading for objective questions or provide tools for efficient manual grading of subjective responses.

10. Fees Module

Comprehensive Fee Structuring: Enables the institution to define and manage diverse fee structures for different programs, courses, student categories, and academic years.

Automated Fee Calculation: Automatically calculates fees due for individual students based on their enrollment and other applicable criteria.

Financial Planning & Transparency: Provides clear visibility into fee structures for both administrators and students, supporting financial planning and reducing billing inquiries.

11. Finance Module

Automated Payment Processing: Offers robust integration with various banking institutions (e.g., Indo Zambia Bank, ZANACO, Access Bank, FNB, ZICB) to automate the reconciliation of student payments. Payments made at the bank are automatically reflected in student accounts.

Custom Bank Integration: EduRole is committed to expanding its banking partnerships. If your preferred bank is not listed, we are eager to collaborate to integrate their payment automation services.

Comprehensive Financial Reporting: Provides a full suite of reporting tools for tracking payments, outstanding balances, revenue streams, and generating detailed financial summaries.

ERP Integration: Supports seamless integration with leading accounting systems such as Sage Evolution, Sage 300, Infor SunSystems, and Microsoft Navision, ensuring data consistency across platforms (setup separately).

SMS Payment Notifications: Integrates with the SMS module to instantly notify students upon successful payment processing.

12. Document Management Module

Centralized Document Management: A versatile file manager allowing administrators to upload, organize, and share documents and resources across the institution.

Create custom forms and workflows and collect information from students and staff, attach payment steps or approval steps easily.

Customizable Access Control: Create custom pages displaying specific files or allow users to browse through entire directories based on their permissions.

Personal User Directories: Provides options for user-specific home directories, allowing staff and students to store and manage their personal academic files securely.

13. Grades Module

Comprehensive Gradebook Functionality: A full-featured gradebook module for managing all aspects of student assessment and grading.

Secure Grade Entry & Access: Authorized staff members can securely upload, modify, and finalize grades. Students can log in to view their own academic progress and results in real-time.

Calculation & Reporting: Supports automated calculation of final grades, GPA, and can generate various academic performance reports.

14. Human Resource Management (HRM) Module

EduRole has a comprehensive HR system integrated, this HR system is used by many organizations and has full compliance with statutory contribution submissions in Zambia (PAYE/, NHIMA, NAPSA, WCFCB).

Holistic Staff Management: Manage establishment, comprehensive staff profiles, including personal details, qualifications, employment history, sick leave, payroll etc.

Performance & Development: Administer Key Performance Indicators (KPIs), conduct performance appraisals, and track staff development.

Administrative HR Functions: Streamline management of job positions, contracts, leave requests and approvals, and other essential HR workflows.

15. Library Module

Seamless Koha Integration: Designed to integrate smoothly with the Koha Integrated Library System.

Automated Patron Management: Automates patron entry into Koha using existing EduRole user data, reducing manual data entry and ensuring consistency.

Profile Synchronization: Synchronizes profile photos from EduRole to Koha, enhancing the user experience in the library system.

16. Procurement Module

Streamlined Purchasing Workflow: Manage the complete procurement cycle, starting with the creation of purchase requisitions by authorized staff.

Multi-Level Approval Chains: Implement customizable approval workflows, ensuring requisitions are reviewed and authorized by the appropriate personnel at various stages within the organization.

Purchase Order Generation: Once approved, efficiently create and issue purchase orders to vendors.

Financial Integration: Links directly with the Finance module for managing payment vouchers associated with purchase orders, ensuring a cohesive procure-to-pay process.

17. Program Management Module

Structured Academic Offerings: Enables the comprehensive management of academic programs within the system. Define program structures, learning outcomes, duration, and associated requirements.

Course Bundling & Curriculum Mapping: Each program consists of a defined set of courses. This module facilitates the bundling of these courses, making it easier to manage curriculum, prerequisites, and student progression pathways.

Efficient Academic Administration: Simplifies the organization and administration of academic offerings, ensuring clarity and consistency across the institution.

18. Online Registration Module

Accessible Worldwide Registration: Empowers students to register for courses and programs online from anywhere in the world, offering unparalleled convenience and flexibility.

Reduced Administrative Burden: Automates key aspects of the registration process, significantly reducing manual data entry and administrative workload for staff.

Integrated Financial Clearance: Fully integrates with the Finance module, allowing for real-time verification of financial standing and processing of registration-related payments before finalizing enrollment.

19. Reporting Module

Custom Report Generation: Provides a flexible and powerful reporting engine that allows institutions to easily design and generate custom reports tailored to their specific data analysis needs.

Data-Driven Insights: Extract valuable insights on student enrollment numbers, academic performance trends, demographic distributions, financial summaries, and more.

Informed Decision-Making: Equip administrators and faculty with the data necessary to make informed decisions regarding resource allocation, curriculum development, and institutional strategy.

20. Statement of Results Module

Official Academic Records: Generate official Statement of Results documents, suitable for printing on official institutional paper. Secure QR codes for offline verification by employers or ZAQA linking back directly to a profile of the student with their graduation records and transcript.

Bulk & Individual Printing: Offers the flexibility to print statements in bulk for entire cohorts or individually for specific student requests.

Gradebook Dependency: This module requires the Grades module to be active, as it pulls authenticated academic performance data to populate the statements.

21. Stock/Stores Management Module

Inventory Control & Tracking: Enables systematic management of institutional stock and inventory items.

Goods Received Process: Facilitates the creation of Goods Received Vouchers (GRVs) based on issued Purchase Orders, ensuring accurate intake of items into stock.

Warehouse Management: Items are automatically cataloged into configurable warehouses or storage locations.

Requisition & Issuance Workflow: Staff can submit stores requisitions to request items. The stores department can then process these requests and issue Issuance Vouchers, maintaining a clear record of item distribution and stock levels.

22. SMS Module

Instantaneous Communication: Integrates SMS messaging directly into the EduRole platform, enabling rapid communication with students and staff.

Automated Notifications: Automatically notify students of important events such as successful payment confirmations or the release of their grades.

Bulk Messaging Capabilities: Allows administrators to send bulk SMS messages to all students, specific groups, or faculty for announcements, reminders, or emergency alerts.

23. Transcript Module

Comprehensive Academic Transcripts: Generate official academic transcripts that provide a complete record of a student's academic history, including all courses

taken, grades achieved, and degrees conferred. Secure QR codes for offline verification by employers or ZAQA linking back directly to a profile of the student with their graduation records and transcript.

Secure & Official Documentation: Designed for printing on official institutional paper, suitable for university applications, employer verification, and other official purposes.

Bulk & Individual Generation: Supports the printing of transcripts in bulk or on an individual basis as required.

Gradebook Dependency: Relies on the Grades module for accurate and up-to-date academic data to compile the transcripts.

24. RADIUS Integration Module

Unified Authentication: Directly integrates with FreeRadius servers, a widely used open-source RADIUS solution.

Single Sign-On for Wi-Fi: Enables students and staff to use their existing EduRole login credentials to authenticate and access the institution's Wi-Fi network.

Simplified Access Management: Reduces the need for multiple usernames and passwords, streamlining network access and improving user convenience while maintaining security.

NOTE: These are just some of the core modules of EduRole, with over 125 modules we have many more modules, and can develop custom functionality on the fly as we work with your departments to gather requirements.

4. Requirements for the EduRole platform

There are a number of requirements for being able to run the EduRole platform.

4.1. Server hardware

In terms of hardware, EduRole is a lightweight system we recommend the following minimum system configuration for an institution of Medpro College of Health Sciences's size:

- Recent processor 3ghz+ (Xeon) preferably 12 cores or more.
- Minimum 64GB RAM recommended (DDR4 or DDR5)
- NVME based storage of at least 4TB for data storage.

For the storage of information, we recommend a RAID setup that enables at least one disk to fail before any data is lost. If you are not able to run a RAID level setup, please ensure a redundant system or continuous backup solution to prevent data-loss.

NOTE: If you are not having a suitable server, we are able to provide you with reliable servers at very competitive rates. Please get in touch for more information.

Alternatively we also offer cloud hosting services, securely managing your system hosting and data for you. You will always retain full ownership of all data and code.

4.2. Power backup

To ensure that your server does not lose power in the eventuality of power failure we recommend having a UPS or Inverter backup system with adequate power. Power failures in a live database environment are disastrous and will most often lead to database corruption or worse.

If you do not already have a reliable power backup system, we are able to provide you with a power backup system for your server room at the best rates. Please get in touch for more information.

5. Data Protection and Security

EduRole was built for institutions that handle large volumes of personal and financial data. Access to every function is governed by full role-based access control, with optional two-factor authentication, configurable password policies, automatic logout protection and session timeouts. A comprehensive audit module with SecureLock tamper-evident technology records all financial and academic transactions, so every change can be traced to a user and a point in time.

For business continuity we recommend and implement RAID storage, automated scheduled backups and a documented disaster recovery procedure. The built-in system health monitor gives ICT staff live visibility of database, storage, performance and error conditions, and an audited maintenance mode allows controlled downtime windows.

Whether hosted on the University's own servers or in our cloud, all data remains within Zambia in local data centres, and the University always retains full ownership of its data and source code. These controls support the University's obligations under the Data Protection Act, No. 3 of 2021, including access logging, data security safeguards and controlled disclosure of personal information.

6. Extending EduRole

To extend EduRole developers can build their own function modules to replace, extend or build functionality in the system. EduRole uses a model view controller system to implement functionality.

EduRole is easy to integrate through its secure RESTful API interfaces.

We offer extensive training for software developers on how to extend EduRole.

7. Implementation Plan

A typical EduRole Campus implementation at an institution of Medpro College of Health Sciences's size takes approximately 14 weeks from contract signing to go-live. Implementation follows a proven five-phase approach, and modules can be rolled out in stages so that the running academic calendar is not disrupted.

Phase	Key activities	Timeline
1. Project initiation	Project kick-off, steering committee, requirements confirmation workshops, infrastructure readiness review.	Weeks 1-2
2. Installation and configuration	Server or cloud environment setup, platform installation, module configuration, institutional branding.	Weeks 3-6
3. Data migration and integrations	Migration of student, academic, financial and HR records; bank, accounting, eLearning and library integrations; verification of migrated data.	Weeks 6-10
4. Training and acceptance	Administrator and ICT training, departmental end-user training, user acceptance testing and parallel running.	Weeks 10-14
5. Go-live and support	Production cut-over, on-site go-live support, start of the 12 months of included support.	Week 14 onward

Throughout the project, a dedicated CoreLink project manager reports to the University's steering committee, and parallel running before cut-over ensures that no data or business process is lost in the transition.

8. Financial Proposal

We offer EduRole Campus to the Medpro College of Health Sciences in three packages. All amounts are quoted in Zambian Kwacha (ZMW) and exclude VAT unless stated otherwise. We recommend the Comprehensive package, which delivers the full platform including all banking, accounting, eLearning and library integrations shown in this proposal.

Scope	Basic	Standard	Comprehensive —
EduRole Campus core platform (admissions, registration, student records, gradebook, transcripts, fees and billing, HR and payroll, procurement, stores, reporting, SMS, document management and workflows)	✓	✓	✓
Implementation, installation and configuration	✓	✓	✓
Data migration from current systems	✓	✓	✓
Staff and ICT training	✓	✓	✓
12 months of support and updates	✓	✓	✓
eLearning (built-in platform and Moodle integration)	—	✓	✓
Library and repository (eLibrary, Koha and DSpace integration)	—	✓	✓
Financial integrations (automated bank payment reconciliation)	✓	—	✓
Other integrations (RADIUS Wi-Fi single sign-on, DSpace repository, custom API integrations)	—	—	✓
Sage, SunSystems and Microsoft Navision accounting integration)	—	—	✓
Multi-campus management	—	—	✓
Advanced integration & technical architecture support	—	—	✓
Custom API development	—	—	✓
SMS, Chatbot and Email Integration	✓	—	✓
AI enabled reporting	—	—	✓
Investment (once-off)	ZMW 280,000	ZMW 480,000	ZMW 780,000

8.1. Payment schedule

The once-off investment is payable in three milestone-based instalments:

Stage	Milestone	Share
1	Contract signing and project initiation	40%
2	Completion of installation, data migration and user acceptance sign-off	40%
3	Go-live and final handover	20%
	Total	100%

The same 40% / 40% / 20% schedule applies to the Basic package

8.2. Support and Service Level Agreement

All packages include 6-12 months of support, maintenance and updates from go-live.

This financial proposal is valid for 90 days from the date on the cover letter.

9. Screenshots

The screenshots below are taken from a live EduRole Campus installation at a Zambian university, showing the platform as it runs in production today.

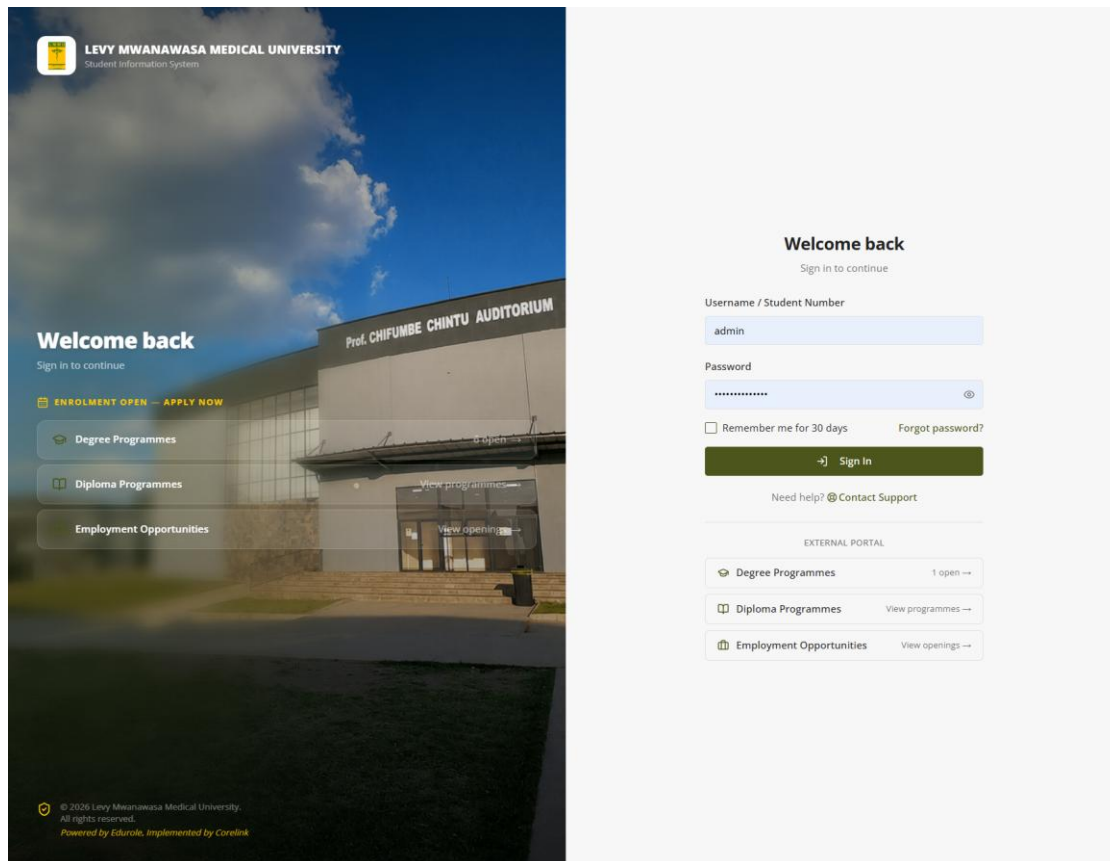

FIGURE 1 - LOGIN PAGE

Each institution receives a fully branded login portal. Users sign in with their student number or staff username, with support for password recovery and two-factor authentication, while public visitors get quick links to open degree and diploma programmes and employment opportunities.

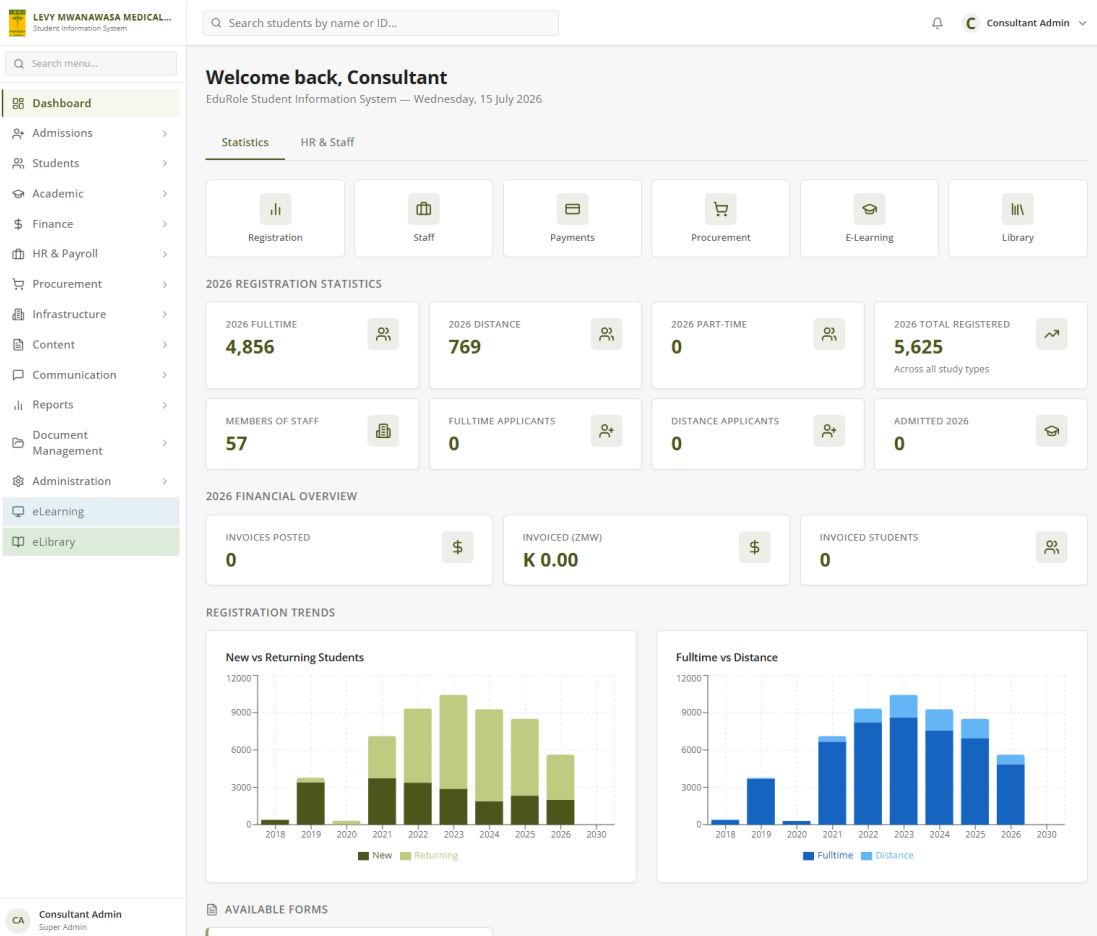

FIGURE 2 - MAIN DASHBOARD (CONFIGURABLE)

The administrative dashboard gives a real-time overview of the institution: registration statistics by study type, a financial overview, staff counts and multi-year registration trends, with one-click access to registration, staff, payments, procurement, e-learning and library functions.

Course Content

Course Overview

 Applied Biology introduces students to the fundamental principles of life sciences, including cell biology, genetics, ecology, and evolution. Students will develop practical laboratory skills alongside theoretical knowledge to understand living organisms at molecular, cellular, and organism levels.

Unit 1: Cell Biology

 This unit covers the fundamental concepts of cell biology, including prokaryotic and eukaryotic cell structure, organelle functions, membrane transport mechanisms, cell division (mitosis and meiosis), and cellular energy production through photosynthesis and cellular respiration.

 **Introduction to Cell Biology — Video Lecture**
<https://www.youtube.com/embed/8l2Kr08kk>

Unit 2: Genetics & Heredity

 Genetics explores how traits are inherited across generations. Topics include Mendelian inheritance, Punnett squares, dominant and recessive alleles, co-dominance, incomplete dominance, sex-linked traits, chromosomal mutations, and an introduction to DNA structure and gene expression.

 **Khan Academy — AP Biology Reference**

FIGURE 8 - ELEARNING COURSE BUILDER

Course content is built directly in the platform using content blocks, units, embedded video lectures, external references, quizzes and assignments. EduRole can also integrate with Moodle where preferred.

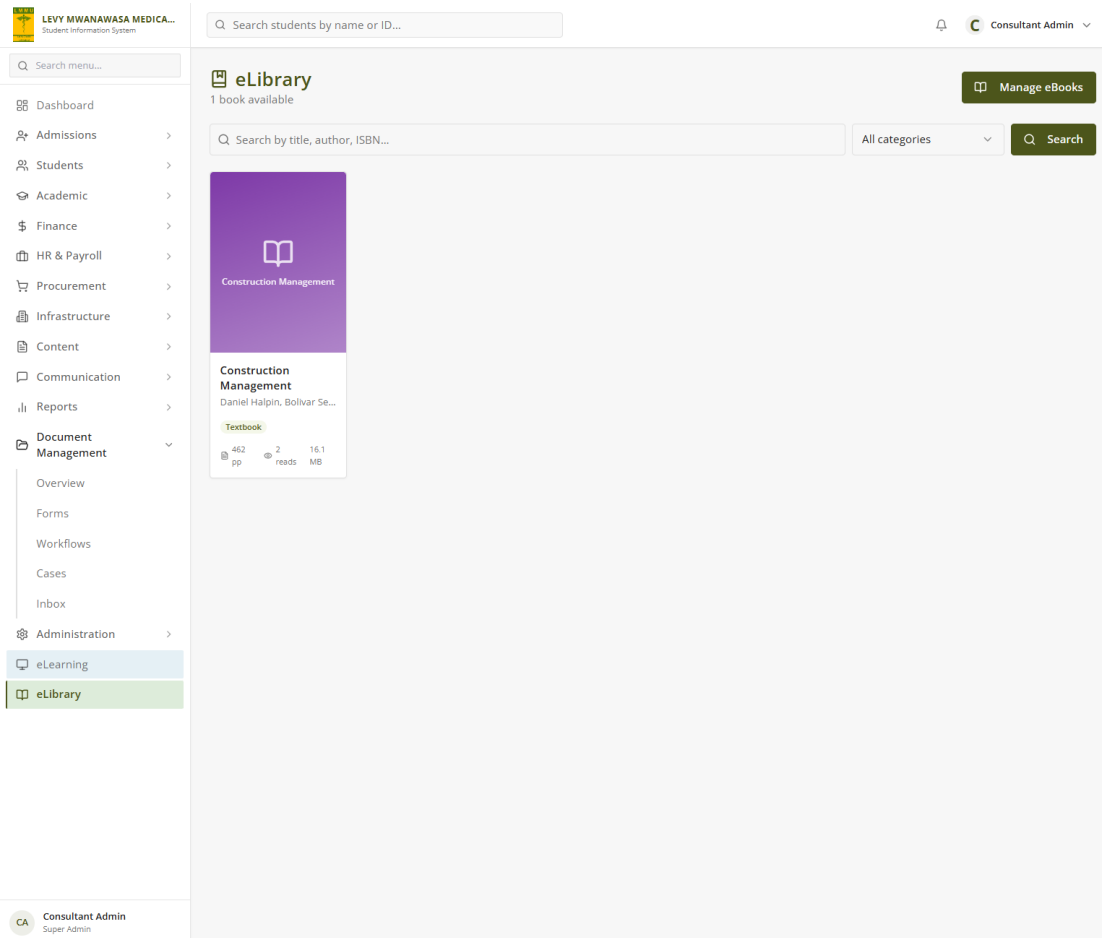

FIGURE 9 - ELIBRARY

The built-in digital library lets students search and read e-books by title, author or ISBN, with categories and usage statistics. For physical collections, EduRole integrates with the Koha library system.

Financial Settings

Select the finance integration mode: built-in, Sage, or Microsoft Navision.

Finance Integration Type

Choose how the system records and synchronises financial data.

☒ **Local (built-in)**
Use the built-in billing and transactions tables. No external accounting system required.

☐ **Sage Accounting**
Sync invoices and payments to Sage via the API. Configure Sage credentials in the Integrations tab.

☐ **Microsoft Dynamics NAV / Business Central**
Push financial data to Microsoft Navision (Business Central) via OData or REST API.

FIGURE 15 - FINANCIAL INTEGRATION SETTINGS

Finance can run on the built-in billing and transaction tables, or synchronise with Sage Accounting or Microsoft Dynamics NAV / Business Central via API.

System Settings

Configure system-wide settings, integrations, and security options. Changes take effect immediately.

Examination Settings

Configure grading scales, permit procedures, eligibility criteria, and assessment component weights.

Grading Scale

How final totals are converted to letter grades

☒ **University Standard**
Letter grades A-F with GPA points. Suitable for degree and diploma programmes.
☐ **Local (1-5 Scale)**
Numeric grades 1 to 5 based on the national secondary school grading standard.
☐ **Cambridge (A*-U Scale)**
Cambridge international grade scale for IGCSE and A-Level programmes.

Save Changes

Exam Permit Procedure

Automatic permits, admin registration and approval, or student exam permit registration

☒ **Automatic**
Permits are generated automatically when a student meets all conditions — billing threshold, course registration, and attendance. No manual step required.
☐ **Administration Approval**
Students are checked against all conditions but an admin must review and explicitly approve each permit before it is issued. Gives staff full control over who sits the exam.
☐ **Exam Registration**
Students must actively register for the examination period. Registration opens and closes on configured dates. Eligibility is still checked at registration time.

Save Changes

Permit Eligibility Criteria

Registration, fee clearance, and attendance requirements

Assessment Components

FIGURE 16 - EXAMINATION SETTINGS

Grading scales (university standard A to F with GPA, local 1 to 5, or Cambridge A* to U), exam permit procedures, eligibility criteria and assessment component weights are all configurable per institution.

System Settings

Configure system-wide settings, integrations, and security options. Changes take effect immediately.

Security Settings

System-wide password policies, session timeout, and two-factor authentication.

Password Policy

Minimum length (characters)

8

Minimum 4, recommended 8 or more.

Expiry period (days)

0

0 = passwords never expire.

Require uppercase letter

Password must contain at least one A-Z character.

Require number

Password must contain at least one digit (0-9).

Require special character

Password must include symbols such as !@#\$%^&*

Session

Session timeout (minutes)

480

Inactive sessions expire after this many minutes. Max 10 080 (1 week).

Login Policy

Configure how login attempts are handled, including warnings and logout behaviour.

Enable login attempts warning

Warn the user how many attempts they have left before logout.

Warn when attempts remaining

2

Show the warning banner when this many attempts are left.

FIGURE 17 - SECURITY SETTINGS

System-wide password policies, password expiry and session timeouts are enforced centrally.

480

Inactive sessions expire after this many minutes. Max 10 080 (1 week).

☐ Login Policy

Configure how login attempts are handled, including warnings and logout behaviour.

☒ Enable login attempts warning

Warn the user how many attempts they have left before logout.

Warn when attempts remaining

Show the warning banner when this many attempts are left.

☒ Enable logout protection

Temporarily blocks login after repeated failed attempts.

☒ SOFT LOCK

Failed attempts

Triggers a short cooldown

Cooldown (minutes)

How long the cooldown lasts

☒ HARD LOCK

Failed attempts (in logout window)

Triggers an extended logout

Logout duration (hours)

Max 168 hours (1 week)

☒ Two-Factor Authentication (2FA)

☒ Optional

Users may enable 2FA for their own account but it is not enforced.

☐ Required for staff

All staff and admin accounts must enrol in 2FA. Student accounts are exempt.

☐ Required for everyone

Every user — students, staff, and admins — must use 2FA to sign in.

FIGURE 18 - LOGIN POLICY AND TWO-FACTOR AUTHENTICATION

Repeated failed logins trigger soft and hard lockouts with configurable thresholds, and two-factor authentication can be optional, required for staff, or required for everyone.

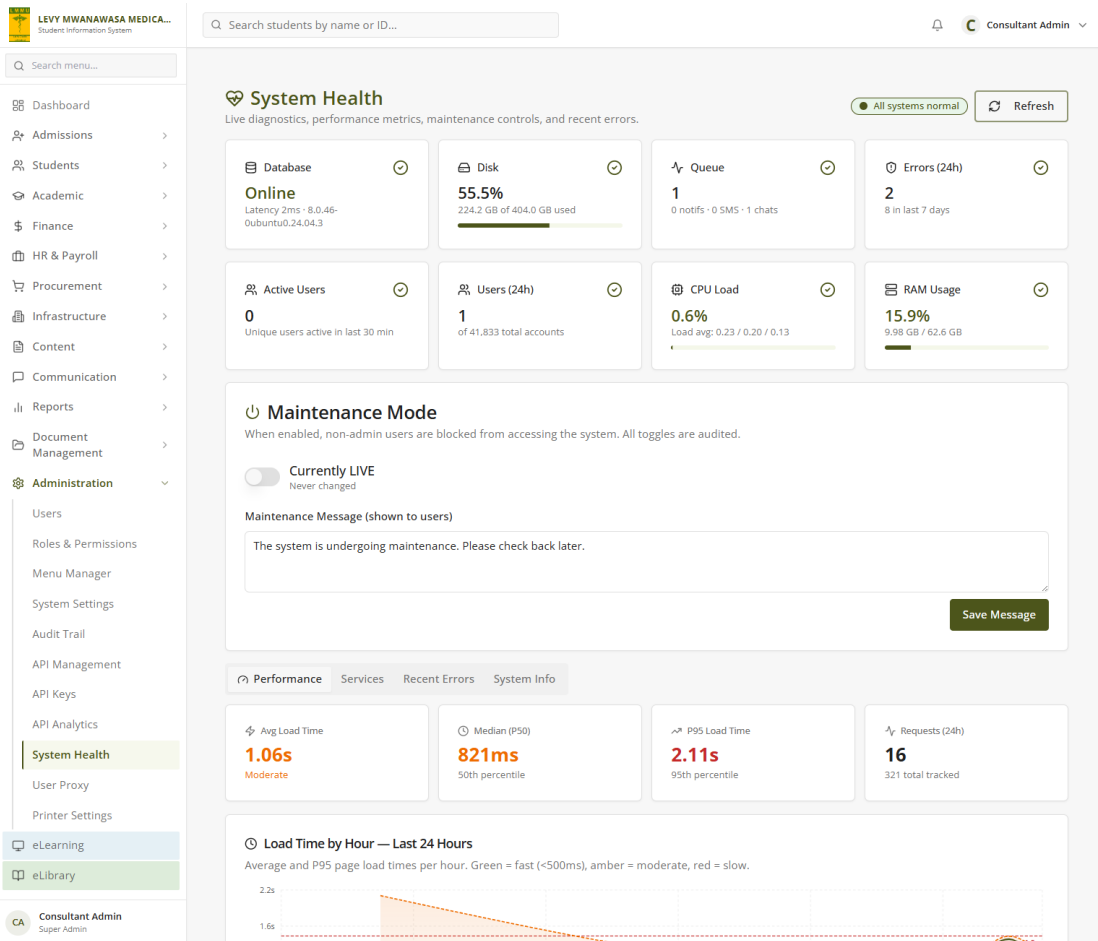

FIGURE 19 - SYSTEM HEALTH MONITORING

ICT staff have live diagnostics of database, disk, queue, CPU and memory usage, page-load performance and recent errors, plus an audited maintenance mode, without needing external monitoring tools.

10. Our company details

Zambia currently has one licensed provider of EduRole that offers professional consultancy services to help you integrate the system in your organization:

CoreLink Consulting Ltd.

Ngwerema Road 5, Olympia Park
Lusaka, Zambia

TPIN No: 2564304921

Phone Number: +260963493849

Email: info@corelink.co.zm

Website: www.corelink.co.zm

10.1. CONFIDENTIAL & PROPRIETARY

This document contains confidential and proprietary information belonging to Corelink Consulting Limited and is provided solely for the purpose of evaluating the proposed EduRole Campus solution.
